IMPERON GROUP FERTILIZER TRADE INC.

# COMPANY INTRODUCTION

## Growing the Future with Trust and Quality

IMPERON GROUP FERTILIZER TRADE INC. is a dynamic chemical raw materials supplier serving the agriculture and industrial sectors in Turkey. With a strong global supplier network and extensive technical expertise, we deliver high-quality chemical products that meet international standards while responding to local market dynamics.

### 01

#### GLOBAL PRESENCE

We work with internationally reputable manufacturers and maintain a strong global supply chain. This allows us to guarantee consistent product quality and sustainable supply continuity.

### 02

#### TECHNICAL EXPERTISE

We provide pre-sales and after-sales technical consultancy to ensure the correct and efficient use of our products.

### 03

#### SUSTAINABLE & RESPONSIBLE OPERATIONS

We prioritize environmental responsibility and human health. Safe transportation, storage, and handling procedures are strictly followed in line with international standards.

### 04

#### CUSTOMER-CENTRIC APPROACH

Customer satisfaction is at the heart of everything we do. We provide fast, flexible, and effective solutions tailored to each client's specific operational needs.

# OUR MISSION & VISION

## **Our Mission**

To supply essential agricultural and industrial chemicals in a reliable, fast, and cost-effective manner, contributing directly to our customers' operational efficiency and growth.

## **Our Vision**

To become the preferred, reliable, and innovative supplier in our region, playing a leading role in meeting agricultural and industrial chemical demands.

# PRODUCT PORTFOLIO

We combine world-class quality with dedicated local service in Urea, Ammonium Sulfate, and Calcium Chloride – acting not only as a supplier, but as a trusted solution partner.

## A UREA (46% NITROGEN)

Urea is a high-nitrogen fertilizer that plays a critical role in supporting plant growth and agricultural productivity.

### Applications:

- Grains
- Fruits and vegetables
- Industrial processes
- Animal feed applications

## 02 TECHNICAL SPECIFICATIONS:

- 46% Nitrogen (N)
- Granular form
- High solubility

## B AMMONIUM SULFATE ((NH<sub>4</sub>)<sub>2</sub>SO<sub>4</sub>)

A white crystalline inorganic fertilizer produced from ammonia and sulfuric acid. It provides both nitrogen and sulfur.

### Applications:

- Water treatment
- Chemical manufacturing
- Food processing (yeast nutrient)
- Leather processing
- Agricultural

## 02 KEY SPECIFICATIONS:

- 21% Nitrogen (N)
- 24% Sulfur (S)
- Ammonium-based nitrogen form (reduced leaching)
- Soil acidifying effect (suitable for alkaline soils)

## C CALCIUM CHLORITE (CA(CLO<sub>2</sub>)<sub>2</sub>)

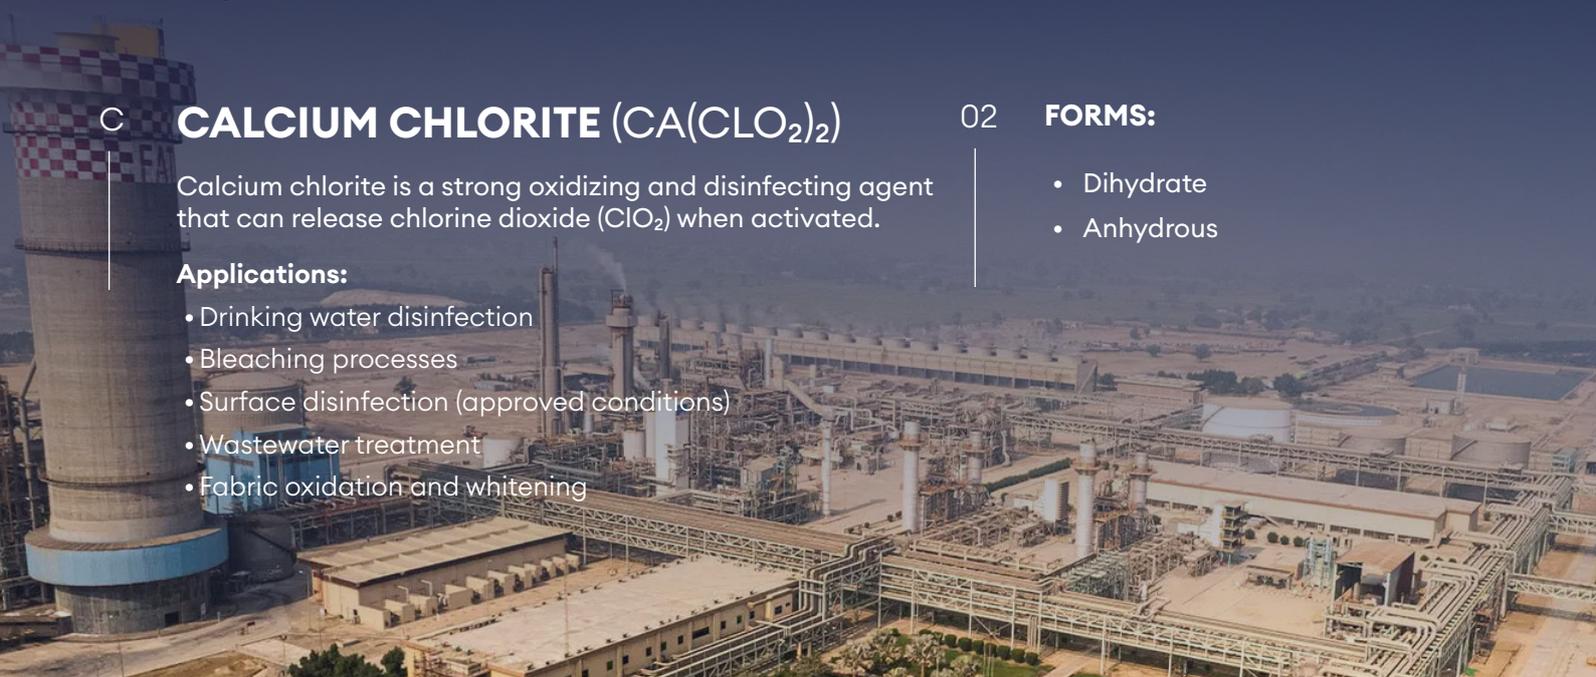

Calcium chlorite is a strong oxidizing and disinfecting agent that can release chlorine dioxide (ClO<sub>2</sub>) when activated.

### Applications:

- Drinking water disinfection
- Bleaching processes
- Surface disinfection (approved conditions)
- Wastewater treatment
- Fabric oxidation and whitening

## 02 FORMS:

- Dihydrate
- Anhydrous
